

①

Module	Scenario ID	Scenario	Scenario Description	Reference document
Vivo Mobile	SC-01 001	mobile box	verify the in box products verify the mobile charger verify the mobile case verify the sim Ejector	online Shopping
	SC-02	mobile design	verify the mobile grip verify the mobile color verify the mobile slimness verify the mobile back side class/plastic verify the mobile weight	
	SC-03	mobile display	verify the mobile display size verify the mobile display type LED/LCD verify the mobile resolution type	

Module	Scenario ID	Scenario	Scenario Description	Reference document
	SC-04	mobile app operating system	verify the mobile operating system	
	SC-05	Mobile Processor	verify the mobile processor type verify the mobile processor core verify the mobile clock speed	
	SC-06	mobile storage & Memory	verify the mobile internal storage verify the mobile support external memory card verify the mobile phone RAM.	Online Shopping
	SC-07	mobile Camera	verify the mobile phone Primary camera verify the mobile phone Secondary camera verify the camera flash.	
	SC-08	mobile Connectivity	verify the mobile Network type verify the mobile supported networks verify the mobile Internet connectivity verify the mobile bluetooth connectivity	

Module	Scenario ID	Scenario	Scenario - Description	Reference document
	SC-08	mobile connectivity	verify the mobile wifi connectivity	
	SC-09	Mobile Sensors	verify the mobile sensors	
	SC-10	Mobile Battery	verify the mobile Battery type. verify the mobile Battery capacity	Online Shopping
	SC-11	mobile Multimedia	verify the mobile Audio formats Verify the mobile Video formats	

Test case ID	Test scenario	Test case ⁽⁴⁾	Pre-condition	Test steps expected result	Expected result
Tc-design-001	grip	a) check the grip soft b) check the grip was hard	choose your comfortable grip	Take in your hand rate in your hand	
Tc-design-001	color	a) check the color darkness b) check the color brightness c) check the color attractive	Choose your favorite favorite one	seen the mobile color	
Tc-display-002	Display	a) check the display size small b) check the display size large c) check the display AMOLED d) check the display LCD panel e) check the display resolution	Choose your favorite one	use your mobile phone display.	
Tc-operating system-003	Operating system	a) check the mobile OS for Android (or) IOS b) check the mobile android version c) check the mobile OS smoother d) check the operating system speed. e) check the operating system feature update.	choose your comfortable one	use your mobile phone operating system.	

Test Case ID	Test Scenario	Test Case	Pre-condition	Test steps	Expected result
TC-Mobile connectivity-004	mobile connectivity	a) check the wifi connection b) check the wifi speed c) check the wifi version d) check the bluetooth connection e) check the bluetooth available device	Choose your suitable one	connect the wifi network	
TC-Mobile sensors-005	Mobile sensors	a) check the mobile proximity sensor b) check the mobile accelerometer sensor c) check the mobile E-Compass sensor d) check the finger print sensor e) check the Gyroscope sensor		Add finger print	
TC-Mobile battery-006	mobile battery	a) check the mobile battery inbuilt. b) check the mobile battery removable. c) check your battery capacity.		use your phone and full day.	
TC-Mobile multimedia-007	mobile multimedia	a) check the video player b) check the audio player		play the audio (or) video.
